

SCC200 Application Manual

Section 1: Operating the software

Planning a route:

1. Make sure route planner section is open, if it is not, press the orange “Route Planner” banner to open it
2. Input origin and destination by either:
 - a. Clicking on the input box then clicking on the interactive map
 - b. Typing the entire destination name in
 - c. Clicking a destination from the drop down whilst typing
 - d. Clicking pin icon to the right of the box if you have allowed access to your location
 - e. Clicking on a stop on the map and using the set origin/set departure buttons
3. If you wish to add a stop, you may do so now by clicking the “add stop” button then:
 - a. Inputting (or clicking on the map) your stop
 - b. Selecting the stop duration
4. Select what kind of departure rule you would like:

- a. This should automatically be set to now
 - b. If you would like a depart after/arrive before departure, then select this option from the drop down
 - c. Then input you depart after/arrive before date using the two drop downs that should've appeared
5. Select what kind of result you are looking for:
 - a. By selecting whether you want the least number of changes filter or a fastest time filter
 - b. By selecting a walking speed from the drop-down menu
6. Click "Plan Route"

Creating a new Route:

1. To create a new route simply repeat the steps used to create your first route and click "Plan Route Again"

Viewing Different Routes:

1. Once you have received a journey simply click any journey listed on the Journey Information page to select it
2. Once selected the map will automatically switch to displaying the route you selected
3. Leg details will also be presented to you on the journey information screen

View stops on the map:

1. Simply zoom into your focus area and bus/rail stops will automatically populate once you reach a certain zoom level

Viewing a live bus location:

1. Simply zoom into your focus are and live bus locations will automatically populate once you reach a certain zoom level

Viewing departures:

1. Make sure to zoom in to see relevant stops, see the earlier guide for this
2. Click on the stop you wish to view departures for
3. Click the “view departures button”
4. Departures will then be populated on the Journey Information section
5. Once done click the “x” button in the top right-hand corner of the Journey Information section

Changing Settings:

1. Go to the 3 bars icon in the top right-hand corner of the screen and click on it
2. Click on whichever options is relevant to you i.e. Settings
3. Change the settings to suit your needs
4. Click anywhere off the menu or use the “X” when you are finished

Section 2: Frequent Issues/Questions

The website isn't loading/stop suggestions aren't loading/map icons aren't loading:

1. This issue is usually due to the server not being fully up yet
2. When you have started the app, please allow up to 2 minutes for the route cache to be processed by the python HTTP server

Can I access debugging windows:

1. It may be interesting to you to look at some of the debug windows we use to develop the app as these are easily accessible to you on the machine running the server
2. To access the OTP visual debug window:
 - a. Go to localhost:9090
3. To access the OTP graph debug webpage:
 - a. Go to localhost:9090/graphiql
